

Remei's organic cotton and yarn offer

Your benefits

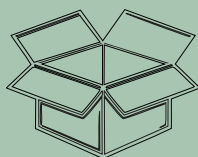

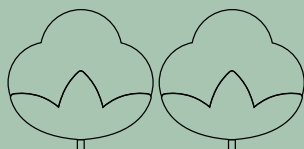

Benefit from over 30 years of experience in the production of traceable organic cotton and yarns, which are the result of our direct co-operation with smallholder farmers.

- 
- + Availability and responsibility for organic cotton**
With our own organisations on-site in India and Tanzania, we ensure the availability of traceable organic cotton. We provide a long-term purchase guarantees to smallholders directly, in order to establish reliable trading relations. By securing market access for smallholder farmers and direct payment of premium for organic cotton above the market price, we want to actively contribute to integrating smallholder farmers into the textile supply chain and reducing risks for them.
 - + Full transparency through digital solutions**
With our digital tool '**my trace by Remei**', we offer complete transparency along the entire supply chain.
 - + Support in achieving your sustainability goals and in communication**
We support you to achieve your sustainability goals. With our customised solutions for organic cotton and supply chain transparency, etc. we support you in positioning your company or brand for the future. We provide you real content from a direct source for an authentic and honest communication.

Remei's organic cotton and yarn offer

Our organic cotton service

The smallholder farmers in India and Tanzania only use GMO-free seeds and cultivate their fields without the use of chemical or synthetic pesticides or fertilizers. Controlled seed is the base for the complete traceability of our organic cotton. The organic cotton is grown in crop rotation to preserve soil fertility and biodiversity to prevent soil erosion. The organic cotton in Tanzania is exclusively rainfed, i.e. there is no artificial irrigation. In India, the fields are partially irrigated using the water-saving drip irrigation system. Harvesting is done by hand on both continents. The organic conformity is tested and certified by recognised and independent certification bodies.

+ Cotton Quality

100% cotton lint (middle staple, organic)

Staple length:	1.3/32"-1.1/8"
Micronaire:	3.5-4.2 ncl
Strength:	min. 27 gtex

+ MOQ
